

Phil Haines
BMT Environment

Biography

Phil is the Managing Director of BMT Environment in Eastern Australia and an expert coastal and flood engineer. Phil helped to pioneer the use of ISO31000 risk-based approaches to coastal and floodplain management in Australia, and led the development of the Brisbane River Strategic Floodplain Management Plan for the Queensland Government. Phil is a recognised expert witness in Queensland and New South Wales on flooding and coastal matters, and a regular presenter at various university and technical seminars and conferences.
